INI Design Studio: Offering Integrated Services

India has seen a significant growth in the real estate sector in the last few years and has played a substantial role in contributing to the economy of the country. The current boom in the construction segment with many large projects in the pipeline has led to a sudden surge in the MEP services segment. This huge stockpile of demand has brought in enormous opportunities for the service and technology providers to allocate necessary skills, technological advancements & resources to meet the requirements of the end users. Ideally fitting into the picture is Ahmedabad based INI Design Studio, a multidisciplinary design firm having diverse portfolio offering professional consulting services in the field of Architecture, Engineering, Planning, Urban Design, Landscape, Sustainability, Interiors, Research and Art.

The firm supports public and private sector clients in a diverse range of markets at every stage, from the initial conceptualization and financial feasibility study to project completion and beyond. The services are provided on projects around region through approximately 175 + professionals having robust national & international experience.

INI Design Studio supports public and private sector clients in a diverse range of markets at every stage, from the initial conceptualization and financial feasibility study to project completion and beyond

As a one stop platform for integrated solutions, INI operates out of four offices in Ahmedabad, Mumbai, Pune and Kolkata, besides having employees stationed at various Project/site offices through India in places including Bengaluru, Hyderabad, Bhubaneshwar, amongst others. "We continue to serve our clients and are already implementing projects pan India, including all major metros. Our project teams include

team members from other offices who directly participate through travel and virtual connectivity based on the project requirements and team-member expertise. Through collaborative initiatives in effect within INI, we regularly have international professionals on short-mid length participation on our India projects," states Jayesh Hariyani, Chairman, INI Design Studio.

The Silver Lining

The journey of INI dates back to 2007. Since then, the firm has constantly strived and established relationships with highly respected Indian specialty consultants to complement their international standards for service. Over the years, INI has attempted to distinguish themselves as an innovative design firm with all disciplines under one roof, and as collaborators with professionals rightly serving the clients.

"We continuously strive to develop great ideas and encourage out of the box design solutions. We have significant expertise in design and engineering cultivated by an in-depth understanding of pertinent issues including prevailing building and zoning codes and regulatory policies. We believe in having a dialogue with our clients and steering them through the entire project lifecycle. We have built a solid reputation by facilitating design solutions which articulate the client's goals and vision throughout the final outcome," avers Jatin.

In the years to come, team INI aims to convey the strength and openness of the firm to design for an ascendant India, design for the built environment in all its aspects in an innovative, sustainable, context-sensitive way. **H**
